EDUCATION

University of Toronto | St. George

Sept. 2021 – May 2026

Honours B.Sc. in Computer Science (Specialist, Computer Systems Focus), GPA: 3.75 / 4.0

Relevant Coursework: AI, Computer Networking, Cybersecurity, Data Structs & Algos, Databases, Operating Systems, Unix Shell

TECHNICAL SKILLS

Programming Languages: HTML/CSS, C, C++, C#, Golang, Java, JavaScript, Kotlin, Python, SQL, Terraform, TypeScript

Frameworks & Tools: Android Studio, AWS, Azure, Django, Figma, Jenkins, MongoDB, .NET, Power Automate, Spring Boot

WORK EXPERIENCES

Mastercard

Toronto, Canada

BizOps Engineer | F5 BIG-IP, Splunk, Python, Jenkins, Bash, GitLab, Draw.io

May - Aug. 2025

- Implemented DNS-based automation for F5 by re-configuring the internal resolution process with FQDN nodes and an internal resolver, eliminating NetOps tickets for manual IP updates and shortening development cycles by **1-2 days** across production
- Led development of an error monitoring dashboard using Splunk SPL, regex parsing, and spreadsheet ingestion to unify fragmented alerts from Opsgenie, Uptrends, and Azure across **5 subteams**; presented by VP to leadership for health assessment
- Automated Azure AD requests for **100+ members** using AI clustering to create role-based access packages for different divisions

Flipp

Toronto, Canada

Software Engineer | Typescript, Go, Svelte, Github

May - Dec. 2024

- Oversaw pagination across micro frontends, lowering publication loading time by **25%** and unlocking **4 additional merchants**
- Configured internal debugger tool, streamlining issue resolution and increasing debugging efficiency by **50%** for colleagues
- Introduced ESLint pre-commit formatting in CI pipeline, catching errors early and reducing code review cycle time by **1-2 days**

SeeRem

Toronto, Canada

Software Developer | MongoDB, Express, React.js, Node.js, Agile Methods

Sept. - Dec. 2023

- Led a team of 6 to build a MERN app to facilitate communication between workers, contractors, and owners on remote worksites
- Directed adoption of Agile and DevSecOps practises into SDLC by embedding automated security tests into CI/CD pipelines
- Engineered geolocal plotting system to organize worksite activities, resulting in **15-25%** increased worker retention

Assetflo

Toronto, Canada

Full Stack Developer | Python, React.js, MongoDB, MQTT

May - Aug. 2023

- Cut manual testing by **50%** and saved **1-5 hrs** per testing suite by building an asset simulator replicating tracking device routes
- Spearheaded unit testing automation of company assets covering **90%** of client use cases, resolving 5G/IOX location bottlenecks

PROJECTS

Fantasy Football FC | C++, Python, PostgreSQL, Docker, Next.js, Tailwind CSS

Feb. 2025 - Present

- Created a full-stack Premier League fantasy sports app with Google OAuth, team drafting, player trades, and a global leaderboard
- Integrated AI-driven features including team performance and bot trade evaluations, raising weekly roster activity by **30-50%**
- Built scheduled GitHub Actions workflow to update **700+ players'** data for up-to-date standings and player performance records

AI Chatbot Analyser | TLI Competition Finalist | Javascript, AWS, Jest, Babel, Framer Motion, NLP

Sept. - Dec. 2022

- Collaborated with 4 TLI classmates to develop a Natural Language Processing app that helps companies analyze top customer intents from chatbot transcripts with customers, generate personalized responses, and integrate them into human-bot conversations
- Innovated algorithms applying tree data structure, increasing resolutions in chatbot conversations by **20-25%** for merchandisers

Quick Stocks | Chrome DevTools, Javascript, HTML/CSS, Fintech

June - Aug. 2022

- Developed a Chrome extension to automatically provide quantitative metrics and stock news on Fortune 500 company websites
- Empowered users to make informed investment decisions, removing **1-3 hrs** in financial record calculations and market analysis

LEADERSHIP

Egyptian Students' Association | Chief of Technology

June 2025 – Present

- Led development of a full-stack web platform for **200+ active UofT students**, featuring event management with Google OAuth authentication, community engagement, and an AI-powered RSVP system, streamlining coordination of **10+ annual events**

Technology Leadership Initiative: UofT (TLI) | Program Member & Alumni

Sept. 2022 – Present

- Selected as **1 of 30 students (500+ applicants)** to develop ML solutions in human-bot interaction for chatbot company Voiceflow
